PROJECTS

BOOKLYST

Contributor to a full stack application that allows users to search for books via Google Speech-to-text or Google Vision API by uploading an image. Incorporated JWT for user authorization on entitled specific pages and localStorage to sign out a user after a given amount of time. Also, integrated with Google Books API to display market prices of a given book.

Tools: JavaScript, MongoDB, Express.js, React.js, Node.js, deployed to Heroku

GitHub: <https://github.com/group3uoft/booklyst>

Deployed: <https://booklyst-project.herokuapp.com/>

BARDIC

Contributor to a one stop shop travel application where the user can plan a trip, keep track of expenses, and share their experiences with others. Provided an intuitive user experience frontend that utilizes custom API calls to save records within the application's database schema.

Tools: JavaScript, SQL, Express.js, Handlebars, deployed to Heroku

GitHub: <https://github.com/FanCinco/Bardic>

Deployed: <http://bardic.herokuapp.com/>

EXPERIENCE

APRIL 2021 – SEPTEMBER 2021

CODING BOOTCAMP, UNIVERSITY OF TORONTO, TORONTO, ON
