## PROJECTS

### BOOKLYST

Contributor to a full stack application that allows users to search for books via Google Speech-to-text or Google Vision API by uploading an image. Incorporated JWT for user authorization on entitled specific pages and localStorage to sign out a user after a given amount of time. Also, integrated with Google Books API to display market prices of a given book.

Tools: JavaScript, MongoDB, Express.js, React.js, Node.js, deployed to Heroku
