EXPERIENCE

APRIL 2021 – SEPTEMBER 2021
CODING BOOTCAMP, UNIVERSITY OF TORONTO, TORONTO, ON

- Work with small teams via Zoom breakout rooms to complete weekly challenge exercises
- Completed weekly module projects that demonstrated the ability to learn about and integrate new technologies in a fast-paced environment
- Notable projects:

    Booklyst

    - A full stack application that allows users to register/login, search for books using various methods, then save them to their favorites list
    - Github: https://github.com/group3uoft/booklyst
    - Deployed: https://booklyst-project.herokuapp.com/

    Bardic

    - A full stack application where the user can register/login, plan a trip, keep track of expenses, and share their experiences with others
    - Github: https://github.com/FanCinco/Bardic
    - Deployed: http://bardic.herokuapp.com/

NOVEMBER 2018 – MAY 2021
COMMERCIAL HVAC/R TECHNICIAN, AIRBORNE MECHANICAL, TORONTO, ON

- Regularly perform maintenance on commercial HVAC/R equipment
- Troubleshoot, problem solve, then fix any issues with the equipment that arose
- Recommend preventative measures to clients to ensure no breakdowns occur during operating hours of business
- Committed to finishing the job properly in a timely fashion to meet the client's expectations
- Trained new employees on the proper methods and techniques used for troubleshooting problems
